Dear Mr. Sergio Garcia,

CPSM certificate extension

We refer to the your communications and request, for an extended validity of the scope certificate, due to reasons beyond your control.

Consequently, considering the reasons provided, the validity of the certificate is extended till the next planned inspection in November 2013 and sent to the Paris address as requested.

Kindly note that:

1. the certificate will be treated as cancelled, if an inspection does not take place in November 2013, for replacement with a new scope certificate.
2. the next cropping season in November / December 2013 must to be inspected prior to the issue of the new scope certificate.

If this harvest is not inspected, the harvested crop cannot be FGP certified.

I trust the above meets with your approval.

Best regards,

Deva Vikrantha
